**Submarket 7**

Improving accessibility and visitability can prepare communities for a growing senior population. A growing senior population raises concerns about whether submarket 7 communities are prepared as accessible and visitable places to live. As new housing is built or current housing is rehabilitated, attention should be given to make sure that housing will address the present and future needs of this...

Submarket 7

Exurban communities have an opportunity to attract younger families by striking the right balance between affordable homes and amenities. Younger families generally need affordable starter home price points in order to become new homebuyers. Additionally, providing amenities such as walkable neighborhoods, parks, and open spaces can help to meet the preferences of younger generations, such as increased interest in biking and walking and more compact home environments.

Strategies

Value of housing planning

Municipalities should invest in long-term planning to identify policies and tools that prepare its housing stock for the future.

Attracting younger families
<table>
<thead>
<tr>
<th>Age-friendly neighborhoods</th>
</tr>
</thead>
<tbody>
<tr>
<td>Communities should create local amenities that will appeal to people of all ages, from young families to seniors. A community can best meet its social and economic demands by having a healthy balance of people from all age groups. Nevertheless, municipalities need to plan for amenities that can attract and retain residents. Neighborhood parks, public spaces and community art spaces such as Karcher Artspace Lofts in Waukegan and those created by Batavia, are only a few of the central elements of an age-friendly community. Read more about age-friendly policies.</td>

<table>
<thead>
<tr>
<th>Inclusionary zoning</th>
</tr>
</thead>
<tbody>
<tr>
<td>Communities can use strong markets to create affordable housing. Inclusionary zoning efforts naturally work well in strong markets, leveraging the construction of new market rate units to add affordable units. Many communities in the region have adopted inclusionary zoning ordinances, including Chicago (ARO), Evanston, Highland Park, and Lake Forest. Affordable requirements ordinance (ARO): Chicago adopted a new inclusionary housing ordinance in 2015. A number of stakeholders identified potential positives and negatives in the ARO. Yet, because the ordinance is so new, it remains to be seen how market rate developers will comply. Monitoring its implementation will help other communities understand whether it will serve as a model.</td>
</tr>
</tbody>

<table>
<thead>
<tr>
<th>Land trusts</th>
</tr>
</thead>
<tbody>
<tr>
<td>Land trusts can provide affordable housing in perpetuity by owning land and leasing it to those who live in houses built on that land. Land trusts, like those operating in Chicago and the North Shore, are often an effective tool in helping preserve currently affordable units due to a land trust's unique ownership structure. When a land trust sells a unit to an owner, they only sell the improvements (i.e. the home), but not the land underneath. As a result, a household can purchase a home for substantially less than what it would ordinarily cost.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Repurpose and redevelop property</th>
</tr>
</thead>
<tbody>
<tr>
<td>Communities should evaluate existing zoning and take stock of existing infrastructure when making decisions about redevelopment. Overdeveloped and vacant retail areas can be rezoned for mixed-use developments or housing. When adding multi-family units near transit, municipalities should consider lower parking requirements to relieve congestion and encourage walkability. Mundelein’s Downtown Design Guidelines, Glenview’s Downtown Development Code, and Libertyville’s payment in lieu of required parking policy are all great examples of how to create a more efficient built environment.</td>
</tr>
</tbody>

back online, more diverse housing options should be included. Now that the market is recovering in many exurban areas of this submarket, municipalities should put some thought into planned unit developments that were never completed due to the housing downturn. Municipalities should consider supporting more diverse housing types to be built in these developments, including small-lot single family housing as well as multi-generational housing. HomeTown Aurora and Georgetown in Batavia are examples of developments that offer varied housing options.

### Growth creates opportunities

**Submarket 7**

*Growth creates an opportunity to create a more “balanced” housing stock, which can better accommodate households of various sizes and income levels.* Whether in the core of the region or at the edges, submarket 7 is growing. That growth creates opportunities. In newly developed communities, new construction creates the chance to create complete communities from the start, with a balanced housing supply that will be resilient to changing housing demand. At the core, this means understanding whether the housing that is being added creates opportunities from across the income spectrum. A more “balanced” housing stock can better accommodate households of various sizes and income levels. While most of the housing stock in the exurban areas of this submarket consists of newer single-family homes, communities can take a new approach that encourages a greater mix of housing types. In Chicago's downtown core, the City can evaluate the opportunities that new development has created for households across the income spectrum in order to forge a path forward that increases housing equity.

### Strategies

**Community education**

Targeted efforts to build support for diversity of housing stock and people can help address community resistance. *Targeted efforts to build support for diversity of housing stock and people can help address community resistance.* Many groups, including elected officials, government staff, non-profits, and citizens, have explored ways to build community support for new housing types and greater local diversity. Utilizing these models in submarket 7 can help address community resistance issues. Read more about the many different best practices.

**Inclusionary zoning**

Communities can use strong markets to create affordable housing. *Communities can use strong markets to create affordable housing.* Inclusionary zoning efforts naturally work well in strong markets, leveraging the construction of new market rate units to add affordable units. Many communities in the region have adopted inclusionary zoning ordinances, including Chicago (ARO), Evanston, Highland Park, and Lake Forest.

**Affordable requirements ordinance (ARO):** Chicago adopted a new inclusionary housing ordinance in 2015. A number of stakeholders identified potential positives and negatives in the ARO. implementation will help other communities understand whether it will serve as a model.

**Land trusts**

Land trusts can provide affordable housing in perpetuity by owning land and leasing it to those who live in houses built on that land. Land trusts, like those operating in Chicago and the North Shore, are often an effective tool in helping preserve currently affordable units due to a land trust’s unique ownership structure. When a land trust sells a unit to an owner, they only sell the improvements (i.e. the home), but not the land underneath. As a result, a household can purchase a home for substantially less than what it would ordinarily cost.

**Repurpose and redevelop property**

Communities should evaluate existing zoning and take stock of existing infrastructure when making decisions about redevelopment. Overdeveloped and vacant retail areas can be rezoned for mixed-use developments or housing. When adding multi-family units near transit, municipalities should consider lower parking requirements to relieve congestion and encourage walkability. Mundelein's Downtown Design Guidelines, Glenview's Downtown Development Code, and Libertyville’s payment in lieu of required parking policy are all great examples of how to create a more efficient built environment.

**Rethink unfinished planned unit developments**

The time is right to explore the future of stalled developments. As stalled planned unit developments come back online, more diverse housing options should be included. Now that the market is recovering in many exurban areas of this submarket, municipalities should put some thought into planned unit developments that were never completed due to the housing downturn. Municipalities should consider supporting more diverse housing types to be built in these developments, including small-lot single family housing as well as multi-generational housing. HomeTown Aurora and Georgetown in Batavia are examples of developments that offer varied housing options.

**Value of housing planning**

Municipalities should invest in long-term planning to identify policies and tools that prepare its housing stock for the future. Via planning tools like the Homes for a Changing Region Toolkit, municipalities can better understand current and future housing needs in their communities and develop strategies to move toward a more “balanced” housing stock. Around the region, communities have been drawing on the principles of accessibility and sustainability to create healthier and safer housing.
